RE: US v. Christopher Bania
Case No. 19CR57

Dear Judge Griesbach,

I would like to provide you with the following update regarding Mr. Bania's medical condition. As I indicated previously, the jail's response to his requests for diabetes related treatment has been to either ignore them or to place him in medical isolation. After the court directed the Marshall's Service to conduct an inquiry, the jail then transferred Mr. Bania to the medical isolation unit. They have not changed his course of treatment, nor have they provided him with the necessary tools by which to address his condition. Instead, they have done exactly what I described had been it's previous reaction, to wit: to take him out of the general population. That accomplishes two things, removal of a cell mate or other fellow inmates who might be able to observe a change in his physical condition and protracted 23 hour a day, or longer, separation from other social contacts. This action compromises both his physical and mental health. I would appreciate any further assistance that the court can provide.

Sincerely,

/s/ Robert G. LeBell
